

מכונת הדבקה פנאומטית "פרס"

PNEUMATIC SOLE PRESS Type SCOUT

Swan neck machine, very quiet, designed for a quick shoes and boots repair with:

- variable inclination cushion, studied for a perfect adaptation to the sole;
- rubber plate-case block for pressing the heel;
- a set of n. 13 pairs of plaques for soles easily replaceable;
- nr. 2 pairs of plates for heel.

Pneumatic functioning set at 8 atmospheres.

Strong and very quiet compressor joined to a tank.

The rapidity of the execution and the facility in the substitution of the outfits make this machine an innovative and high efficiency realisation, especially in the shoe-repair sector.

This machine is supplied with single-phase motor V. 230/50 Hz only.

The machine is manufactured in conformity with the CE Standards.
