CZ/P

SWING ARM KNIFE CUTTING MACHINE

With the flexibility typical of cnc knife cutting machines, CZ/P recreates the same optimal working conditions of swing arm clicking presses.

In the CZ/P, the work area is compact and ergonomic (1300 x 650 mm) and it is served by a cutting head mounted on a telescopic swing arm with axial rotation. This structure which was indeed inspired by swing arm clicking presses allows a **complete accessibility of the work area** that is unobstructed on the front and sides and has a rear pocket to accommodate the leather. The optional **conveyor belt** helps the movement of the material allowing an excellent flow of the work cycle.

The **retractable telescopic head** creates optimal conditions for man-machine integration by facilitating the visibility of the material. The **integrated laser projector** projects distinct shapes on materials of every color and under all lighting conditions.

In addition to the compact design is the versatility of the **multiuse cutting unit**, the efficiency of the vacuum partialization system with **micro-sectors**, and the comfort of a good **noise reduction system**. For this reason CZ/P is also very suitable for design departments and small cutting facilities.

The control software has a practical **editor to import and modify CAD patterns**, even in dxf format.

TECHNICAL DATA

Work area (W x L):	1300 x 650 mm
Maximum cutting speed:	50 m/min
Maximum punching frequency:	300 holes/min
Resolution:	0,025 mm
Power supply (three-phase + neutral):	400 V - 50 Hz
Maximum power consumption:	8 KW
Net weight:	1100 Kg
Dimensions (H x W x L):	1750 x 1577 x 1664 mm
